

Asmaa Maryah

Software Engineer Web Developer

About Me

passionate and dedicated Computer Science student with a love for building creative, user-friendly websites and solving real-world problems through code. I enjoy working on both the front-end and back-end sides of development, and I'm always exploring new technologies to expand my skillset.

I've built several projects that reflect my growth and curiosity in web development, including dynamic to-do lists, finance dashboards, and educational platforms. Whether I'm designing interfaces or writing logic behind the scenes, I strive to make my work clean, efficient, and impactful.

Outside of coding, I'm a lifelong learner who believes in continuous improvement and the power of sharing knowledge. My goal is to contribute to meaningful projects, collaborate with innovative minds, and grow as a developer every step of the way.

Education

2023-2027

Faculty of CSAI, Damietta University

learned programming, software development, and research

2025

NTI Web Development Training

Mastered HTML, CSS, and Bootstrap for responsive designs; built projects with JavaScript; practiced UX principles

Skills

1 HTML

2 CSS

3 JavaScript

4 Figma

5 Bootstrap

6 GIT & GIT HUP

7 C++

8 python

9 DSA

10 PS

11 DB

12 OS

Work Experience

Front-End Developer – Personal & Academic Projects

Remote | 2024 – Present

- Developed multiple responsive websites using HTML, CSS, JavaScript, and Bootstrap
- Built user-friendly interfaces for to-do list apps, tourism websites, and landing pages
- Applied clean code practices and improved user experience through layout and interaction design
- Practiced deploying projects and using Git/GitHub for version control

Trainee – Web Development Track

National Telecommunication Institute (NTI), Egypt

2025

- Received practical training in core front-end technologies (HTML, CSS, JavaScript)
- Completed real-world tasks and mini-projects simulating freelance work
- Learned teamwork, version control with Git, and how to follow UI/UX standards

Founder & Developer – “Per Teck” Career Guidance Platform (Ongoing)

2025

- Working on a smart AI-based web app that helps students choose a career path
- Designed a full user flow: from chatting with an AI, to training paths, to real-world simulations
- Aimed to connect students with companies based on personalized skill-building

Services

1. Website Design & Development

I build responsive, clean, and modern websites using HTML, CSS, JavaScript, and Bootstrap — perfect for personal sites, small businesses, or simple startup pages.

2. Landing Pages

I create fast-loading, eye-catching landing pages optimized for conversions and tailored to your goals.

3. Code Debugging & Fixing

I help identify and fix layout, functionality, or responsiveness issues in your HTML, CSS, or JavaScript code.

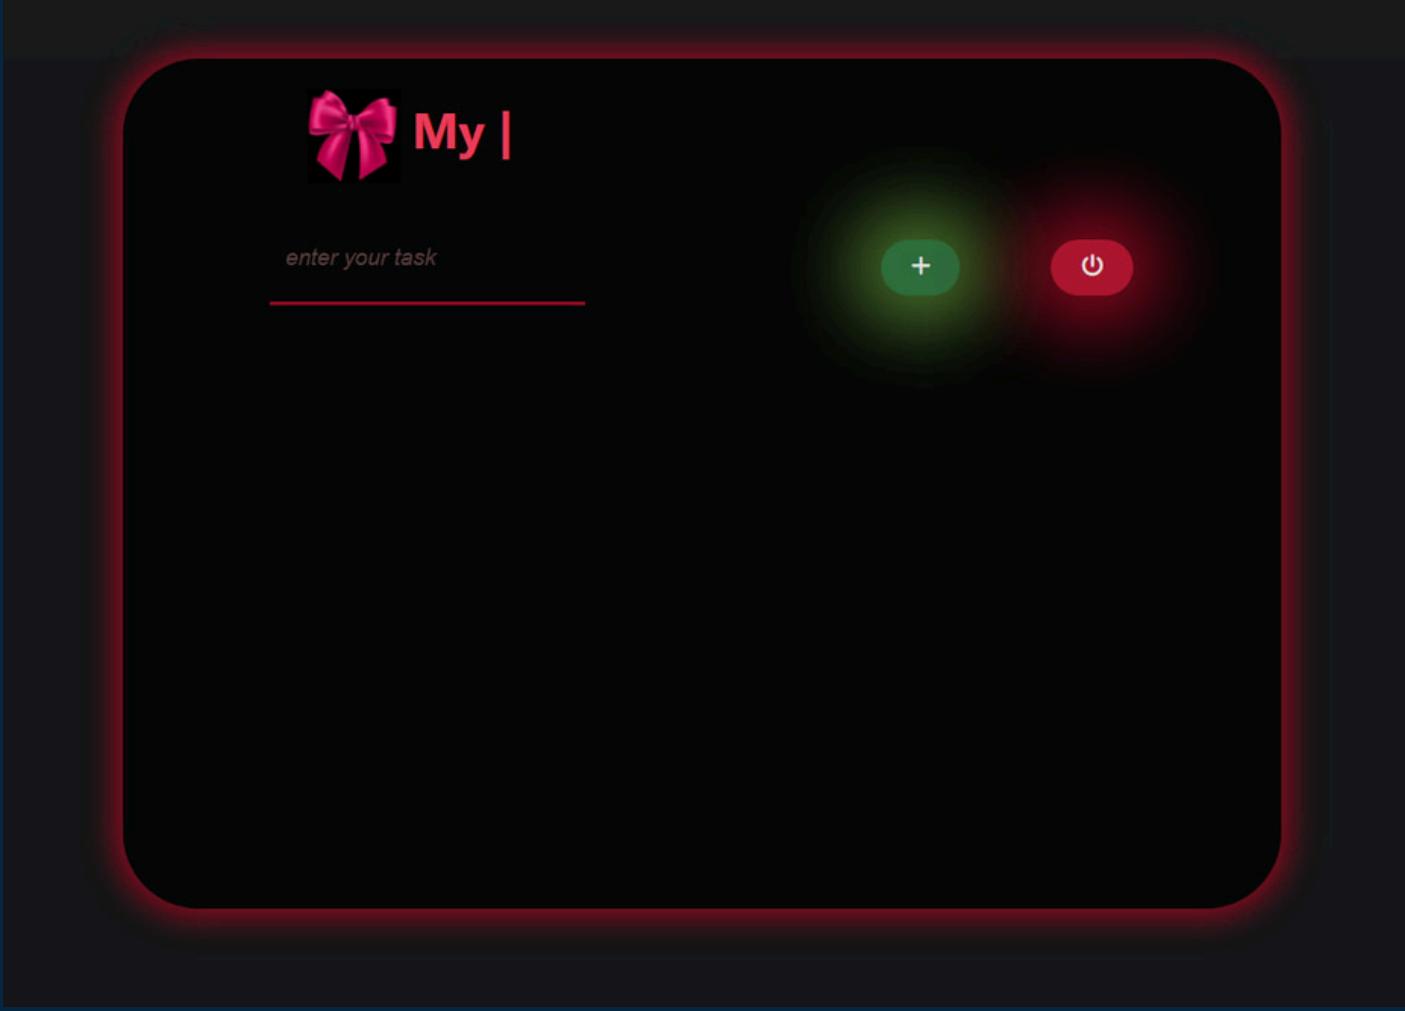

4. Portfolio Development

I assist students and junior developers in building attractive, well-structured portfolios that reflect their skills and personality.

5. UI/UX Improvement Suggestions

I analyze websites and provide practical recommendations to improve design, user experience, and visual flow.

Projects

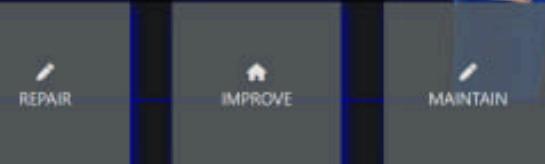

To-Do List App

A simple yet functional task management app built using HTML, CSS, and JavaScript.

Features include task creation, deletion, and completion icons, with a clean and responsive interface.

Repair and Maintenance Services

Ipsum dolor sit amet consectetur adipisciing elit. Id nostrum veniam, incidunt repellendus sunt vitae atque eligendi, aperiam, provident error eveniet ad beatae! Nihil illo fuga odit suscipit natus cumque.

[CONTACT US](#)**About us**

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text. All the randomised words which don't look even slightly

Inance – Finance Dashboard

A mock finance dashboard built to practice UI structuring and component styling. Includes budget indicators, icons, and styled components using Bootstrap and custom CSS.

Home About Services Hotel Contact

Egypt is a land of ancient wonders and timeless beauty. Home to the iconic pyramids of Giza, the enchanting Nile River, and countless archaeological treasures, Egypt offers a unique journey through history and culture. From the bustling streets of Cairo to the serene temples of Luxor and the golden beaches of the Red Sea, every corner of Egypt invites you to explore its rich heritage and vibrant spirit. Whether you're seeking adventure, relaxation, or a deep dive into the past, Egypt is the perfect destination for unforgettable memories.

made by:

Kemet Project:

A responsive web platform that showcases Egypt's history and culture through interactive galleries and informative content, built using HTML, CSS, JavaScript, and Bootstrap.

Library Management Interface

A simple front-end project simulating a library system using HTML, CSS, and JavaScript.

Users can add new books with details like title, author, and number of pages.

Each book can be marked as read/unread or deleted. Data is handled dynamically using JavaScript and stored in arrays (or optionally in localStorage).

This project showcases DOM manipulation, event handling, and clean UI structuring.

My Achievements

Completed Web Development Training at NTI
Successfully finished a professional front-end track
covering HTML, CSS, JavaScript, and Bootstrap with
hands-on projects. Built and Launched Multiple
Personal Projects
